Re: Planning/Design & Implementation of Northern Section of Bluff Point to Preston Tri-Town Trail

Dear Ledyard Tri-Town Trail Committee,

Nafis & Young Engineers Inc. (NYE) along side with The WBA Group (WBA) is pleased to submit our qualifications and fee proposal to provide Planning/Design & Implementation of Northern Section of Bluff Point to Preston Tri-Town Trail for the Town of Ledyard.

NYE and WBA is are professional engineering and design firms that have recently completed many municipal recreation projects throughout Connecticut such as; Parks & Recreation Master Plan of Canton, Seymour Recreation Facilities, Oxford Community Park, Preston Community Park, Lakeside Park, Wallingford, and Foote Memorial Park, Loin's Park, Pardee Park and Young's Pond Park in Branford.

As you are aware William B Aniskovich of WBA completed design and construction assistance services for the Preston Community Park. As such we are extremely familiar with the Tri-Town Trail Master Plan and it's recreational needs. Additionally NYE has done work for the Town of Ledyard Department of Public Works. Our Team of James H. Galligan P.E., William B. Aniskovich P.E., David L. Nafis, P.E., L.S. and supporting staff have the knowledge, experience and dedication needed to successfully complete this project.

Our team employs 15 professional and technical staff including five (5) Licensed Professional Engineers and one (1) Licensed Land Surveyor. NYE has in-house land surveying, grant applications and plan preparation, bid assistance construction management and quick response to resident concerns. We have extensive experience in attending public meetings, environmental services, construction inspection as well as civil design services.

Enclosed you will find our resumes, project examples and references as well as our proposed fee as requested.

We appreciate the opportunity to provide our qualifications to the Town of Ledyard. As President of Nafis & Young Engineers, Inc., I can assure you that our team will be fully committed to this project and look forward to the opportunity to work with the Town of Ledyard.

PARKS AND RECREATION

MASTER PLAN – CANTON, CT.

Nafis and Young Engineers, Inc. (NYE) recently completed a comprehensive Parks and Recreation Master Plan for The Town of Canton. This Master Plan included an inventory of all existing fields and recreation facilities, analysis of the activities of numerous use groups, future growth projections for these groups, determination of need for additional recreation facilities and development of a comprehensive Capital Improvement Program to meet the recreational needs of the community through the year 2005. Specific elements completed by NYE included evaluation of the existing conditions of all the Town's parks, playgrounds and ball fields. Recommendations regarding maintenance items, reseeding and overseeding procedures, safety improvements and ADA improvements were made at each individual site. NYE also developed specific recommendations for several unused town-owned parcels for development of new ball fields, running track, cross-country trail, basketball courts and multi-purpose athletic facilities. The final product for this project was a detailed report that itemized the strengths and weaknesses of all of the town's existing recreational facilities, as well as an overall development plan that prioritized the construction of new facilities to meet the growing needs of the community.

PARKS AND RECREATION

RECREATION FACILITIES IMPROVEMENTS NORTH BRANFORD, CONNECTICUT

**TOWN OF NORTH BRANFORD
909 FOXON ROAD
NORTH BRANFORD, CONNECTICUT 06471**

WALL FIELD AT SWAJCHUK PARK

- ▶ \$750,000 STEAP Grant
- ▶ \$400,000 Special Appropriations Grant
- ▶ Little League Field Design
 - Regulation Little League Field
 - Metered irrigation system
 - Sod play surface in 70-20-10 sand-soil-compost root-zone mix
 - Underdrains and surface drains
 - Access for physically challenged
 - Stadium lighting and scoreboard
 - Concession stand
 - Bathroom facilities
 - Dual batting cages
 - Pre-cast dugouts

Nafis and Young was retained by the Town of North Branford to design and implement a Regulation Little League Field that will qualify to host playoff baseball games. The project involved development of detailed plans and designs within the constraints of a STEAP Grant and Special Appropriations Grant totaling \$1,150,000. Work on these projects included: assistance in securing funds from the State agencies; local Inland Wetland and Planning approvals; and presentations to Parks Commission, Finance Board.

Designs are in conformance with CIAC and Little League Baseball requirements.

Supplementary amenities provided included: ample parking; septic systems; public service buildings; and stormwater drainage. The total cost for all recreational projects was approximately \$1,150,000.

SEYMOUR HIGH SCHOOL

- ▶ 400-meter Rubberized Asphalt Running Track (Broken-Back Design)
- ▶ Shot Put, High Jump, Long Jump, and Discus Facilities
- ▶ Scoreboard, Fencing, Loud Speaker System, and Lighting
- ▶ Soccer-Football Field Infield
- ▶ Sod Play Surface, Underdrains, and Surface Drains
- ▶ Access for Physically Challenged

Kathren Matthies Field, Gary Park, French Memorial Park, Chatfield Park

- ▶ Complete Renovations of Senior League Softball Field
- ▶ Soccer Field Design
- ▶ Complete Renovation of High School Baseball Field
- ▶ Turf Analysis and Reconstruction Design

Nafis and Young was retained by the Town of Seymour to implement a Recreational Facilities Improvement Program. The project involved development of detailed plans and designs for several of Seymour's recreational facilities. Work on these projects included: assistance in securing funds from the State and private agencies; local Inland Wetland and Planning approvals; presentations to Parks Commission, Finance Board, and Board of Selectmen; and approval by local referendum.

Designs are in conformance with CIAC, Little League Baseball, and requirements of the Kathren Matthies Foundation.

Supplementary amenities provided included: walking trails; playscape; septic systems; public service buildings; and new bleachers. The total cost for all recreational projects was approximately \$1,400,000.

PROJECT PORTFOLIO - RECREATION

Parks and Recreation Master Plan Canton, Connecticut

Project Manager in direct charge of the preparation of this comprehensive master plan for recreation facilities in the Town of Canton, CT. Responsibilities included coordination with recreational and scholastic athletic groups to determine existing concerns and future requirements for recreational activities. Additional tasks included: development of design alternatives for recreational sites; preparation of cost estimates; evaluation of safety and ADA issues; and presentations at public agency meetings.

Seymour Recreation Facilities Seymour, Connecticut

Project Manager responsible for development of plans, specifications, cost estimates, and construction administration for construction of a multi-purpose High School Athletic Facility including all-weather track, soccer-football field, lighting, signage, sound system, and access for the physically challenged; a Senior League Softball Field including new bleachers and playing surface; and a High School Baseball Field including new dugouts, bleachers, and pedestrian access.

Oxford High School, Synthetic Field & Track Oxford, Connecticut

Project Manager/ Engineer, responsible for the planning, design and construction administration of an 8 Lane CIAC regulation rubberized asphalt track and combination Football/Soccer/Lacrosse Synthetic Turf Sports Field. Sporting events provided in this design include; hurdles, high jump, long jump, discus, shot-putt and javelin. Field Design included underdrain system, combination soccer/football goal posts, multipurpose line striping and tufted team Mascot Logo. Sight Lighting includes separate controls for game events, lighting and passive trackside lighting.

North Branford Recreation Facilities North Branford, Connecticut

Principal in charge of several recreation projects for the Town of North Branford, CT. Projects included development of a Recreation Master Plan which outlined the use and demand on each of the Town's recreation fields, and development of a 10 year project of youth and school athletics. This project also included preparation of a planning document for construction of several baseball fields, soccer fields and a new high school football stadium. Other recreation projects for the Town of North Branford included design of irrigation systems, drainage systems and technical assistance on grounds repair.

French Memorial Park Tennis Courts, Seymour, Connecticut

Project Manager/ Engineer for the development of an active recreation element added to the existing park. Tasks included analysis of existing surface and subsurface waterflow, subsurface soil analysis, construction documents, and bidding assistance. Project elements included new Tennis court and associated appurtenances as well as site preparation of an adjacent area for future construction of a children's playscape.

Pent Road Park Courts, Beacon Falls, Connecticut

Project manager for renovation of the existing Tennis Courts and basketball courts at the Towns Athletic Complex. Project elements included reclaiming and repaving two (2) existing Tennis Courts, new net poles, netting, play area painting and line striping. Basketball improvements included surface repairs to an existing full court and installation of four (4) half court game areas including basket game areas including the baskets and line striping.

Ms. Palluzzi has worked as a Landscape Architect for over 20 years. Her approach to landscape design is innovative and cost effective, contributing efficient, sound, enduring solutions to often difficult situations. Ms. Palluzzi takes a comprehensive approach to site analysis, ensuring that all factors are accounted for. Specific areas of focus include: athletic and school facilities, park design, streetscapes, commercial applications, and wetland impact solutions. She maintains a high level of expertise with a variety of graphic-based software packages, allowing her to skillfully translate design concepts into construction and detail documents.

With a strong architectural background, Ms. Peck takes a thoughtful approach to both structural and site design. She contributes a modern perspective while balancing historical context, ensuring an appropriate mesh of new design, existing surroundings, and civic needs. With over 25 years experience in design, Ms. Peck's attention to detail and color provide the team with artistic, yet practical sensibility. Her additional credentials in teaching and public speaking make her an invaluable asset in town meetings and other public forums.
